

# BUFFET TROLLEYS

**Type: with heating plate**  
V1-070600-0050

**Type: with cooling plate**  
drop-in - V1-070600-0051  
underglued - V1-070600-0052

**Type: with bar top plate**  
V1-070600-0053

## DESIGN BUFFET

The buffet trolley is easily maneuverable thanks to its four wheels, and the brakes allow you to lock it in place to prevent unwanted movement. The base is magnetically detachable, allowing you to cover the wheels and better integrate the cart into the overall design of the space.

Two types available: A trolley with equipment (either a cooling or heating plate with controls) or a neutral trolley with a top bar plate.

## FUNCTIONS & FEATURES

The trolley can be equipped with either a cooling or a heating plate. The cooling plate features a newly developed lowered aggregate that is easier to maintain and takes up less space. Digital controls are located at the front of the trolley.

Cooling plate 3GN

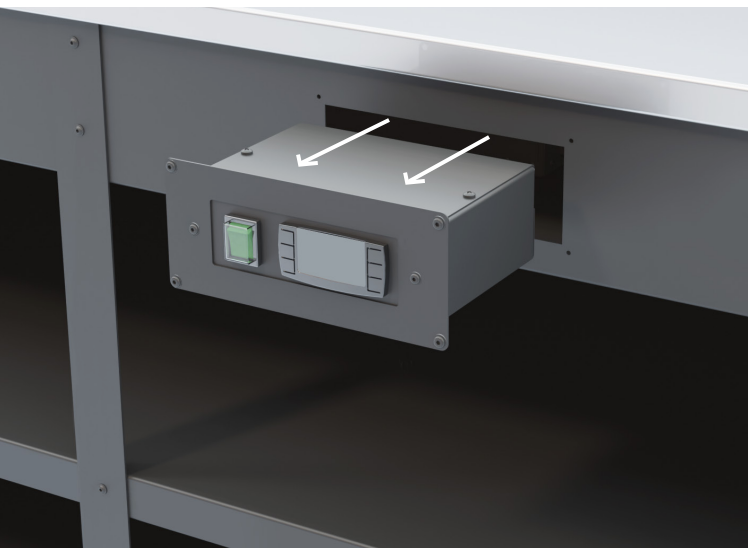

**Technical data:** Temperature: +3°C ~ +8°C,  
Medium: R290, Refr. capacity (-10°C): 0,28kW,  
Power input: 0,2kW, Current draw: 1,4A.

The heating plate uses a glass-ceramic surface that is level with the trolley's working surface. On the front of the trolley, there is a simple control knob, allowing you to set the desired temperature for your dishes.

Heating plate 2GN

**Technical data:** Temperature: +30°C ~ +100°C  
Power input: 0,53kW, Current draw: 2,3A.

## BUFFET WITH COOLING PLATE

### CONTROL PANEL

The control unit can be easily unscrewed and removed for maintenance or replacement.

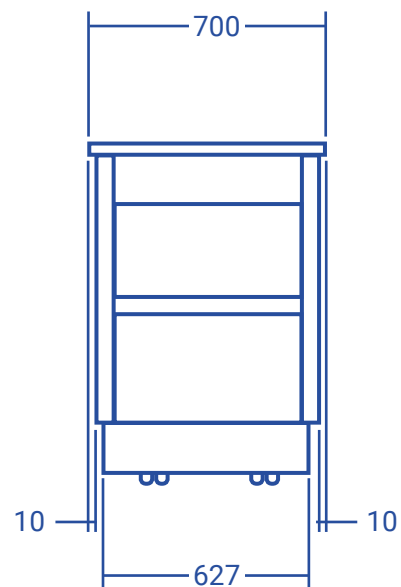

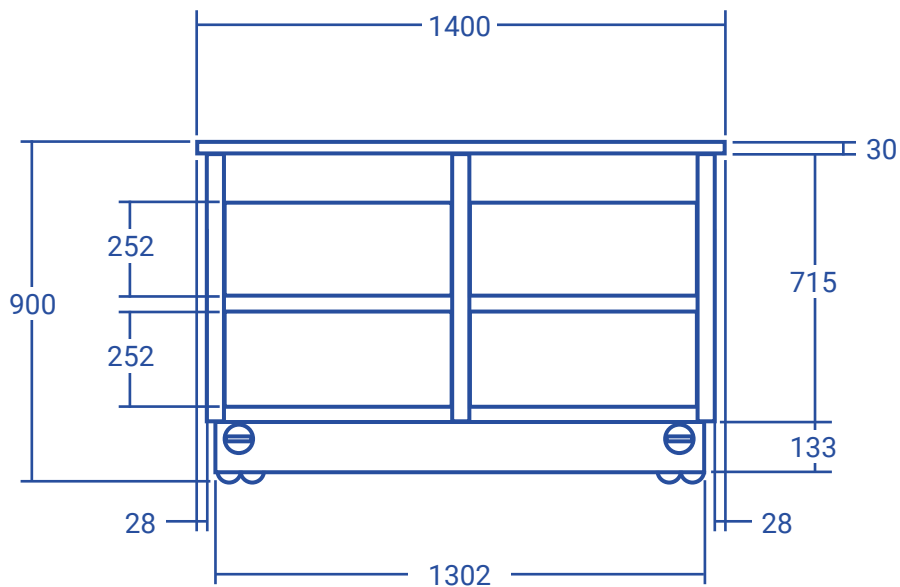

### LOWERED AGREGGATE

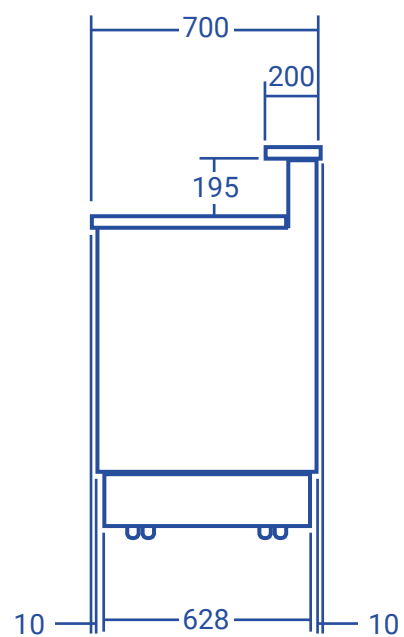

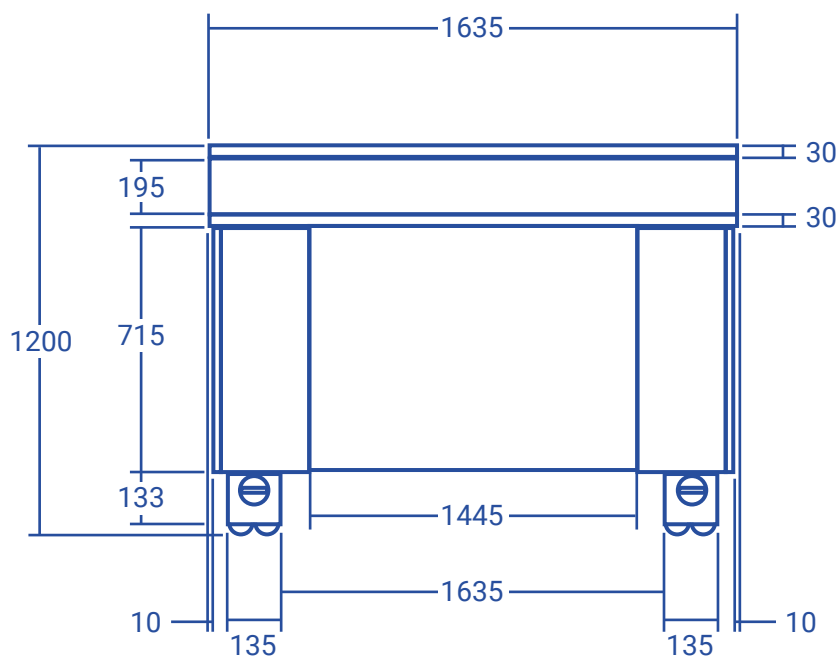

It is easily accessible after unscrewing the front bar and the bottom panel of the plate with vents.

# DIMENSIONS

Type: with cooling or heating plate

Type: neutral with top bar plate

## SPECIAL TROLLEY

This version of the trolley is upgraded with a table extension featuring a ribbed shelf and tray rails on both sides. The worktop consists of a glass-ceramic plate (under which a specific type of equipment will be installed depending on the trolley type) with a wooden frame.

It is equipped with four wheels (two with brakes) and two shelves for storing items such as dishes. Three types: A trolley with cooling, heating or heating-cooling plate that allows you to switch between cooling and heating modes.
