

SERVICE WINDOW

About

This product is designed for dispensing goods with simple handling. With three buttons you control everything - the first one turns on the lights, the second one opens/closes the door and the third button opens/closes the drawer.

The service window has insulated panels and double glazing. The product is intended for outdoor use.

A gutter in the upper part prevents water from entering the sliding door. All the necessary electronics are located on the board, which can be removed for servicing the product. We deliver the product complete and has supply terminals for connection to a fixed distribution.

Choice of color. Made of stainless steel, so it is easy to clean and guarantees a long service life.
